US15-7250

Heavy-Duty Jacket Lifter

Creates a Starting Point for Controlled Jacket Removal on MV and HV Power Cable

The US15-7250 Heavy-Duty Jacket Lifter is designed to lift and separate thick outer jackets on medium- and high-voltage power cables, providing a reliable starting point for jacket removal.

Following jacket scoring, the tool helps technicians lift the jacket away from the cable without damaging underlying layers, reducing the need for knives during the removal process.

Its robust design and increased leverage make it well suited for larger cable constructions commonly encountered in utility, contractor, and cable jointing applications.

Features

- Creates a reliable starting point for jacket removal
- Reinforced lifting pins provide added durability for thicker jackets
- Enlarged hilt helps provide additional hand protection during use
- Lightweight, ergonomic design improves grip and control in the field
- Weather-resistant coated tip designed for demanding jobsite conditions
- Ideal companion to Ripley® US15 Series cable slitters and scorers

Part #	Description	Application	Compatible Cable Types	Function
US15-7250	Heavy-Duty Jacket Lifter	MV/HV Cable Preparation	Power Cable with Thick Outer Jackets	Lifts and separates scored jackets to initiate removal
